

## Quality Policy

Ensure the continuity of customer satisfaction by producing timely, complete, and high-quality products in accordance with the needs and expectations of our customers,

Ensure that our products are of high quality, sustainable, and cost-effective,

Raise the efficiency of all our processes to a level that can compete internationally, in line with the continuous improvement approach,

Raise awareness among all our employees about occupational health and safety, environmental and social compliance, and to create resources for ensuring compliance with legal regulations,

Become a reliable and sought-after company in the industry by continuously improving our quality processes,

Lead the industry by increasing our production capacity and product diversity through R&D studies in our laboratories, in cooperation with national and international universities and institutes,

Lock our employees into common goals and encourage continuous learning with our participatory management,

Achieve mutual sustainable growth by evaluating our stakeholders as a part of our system.
