

## Environmental Policy

In order to protect and sustain our environment, and leave a livable and clean environment for future generations, our company aims to:

- Track and improve our environmental performance,
- Evaluate environmental risks, prevent risks at the source, and minimize them if prevention is not possible,
- Comply with all legal requirements related to environmental issues,
- Ensure continuous improvement and development that meets customer requirements,
- Provide training to all our employees on environmental issues, zero waste, recycling, and recovery, Promote environmental responsibility awareness in all our activities and stakeholders, with regard to environmental sustainability,
- Use the most suitable technologies that cause the least harm to the environment within the framework of technical and economic possibilities, in order to preserve natural resources.
